STUDIO SEGERS

## DESCRIPTION

Mirthe Sofa is an outdoor sofa concept characterised by extra large outdoor cushions, kept in place by subtle, varnished aluminium shells. You can arrange your own personal concept simply by combining the three basic elements. The dryfoam cushion fillings have an open cell structure, allowing air to circulate freely. Water passes through the filling but dries quickly thanks to the open pores. A sophisticated palette of nearly 90 outdoor fabrics allows for endless possibilities in any kind of style.

## MATERIALS

- Frame: 6 mm plate aluminium powdercoated with ultra durable structure lacquer.  
Open bottom structure to create optimal ventilation for the cushions.  
Each module includes a connector piece to connect the individual elements.

## CUSHIONS

Filling in dryfoam which has an open cell structure, so air can circulate freely. Water passes through the filling, but dries quickly thanks to the large open pores, substantially inhibiting fungal growth. Fabrics available in category D, E & F.

## PROTECTION COVERS

For each item a cover is available that protects the furniture against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Always make sure that furniture, cushions and covers are completely dry before covering furniture.

## MAINTENANCE

Powdercoated aluminium is easy to clean with clear water and a pH-neutral fluid detergent. Stubborn stains can be removed with Aluminium Cleaner. If necessary, use a soft brush to remove the dirt from the pores. To protect the frame against the adhesion of dirt, Metal Protector with Teflon® can be used which applies an invisible protective film.
